WATER TREATMENT SOLUTIONS

100% CUSTOMIZABLE MONORAIL DOORS AND SLIDING ROOF HATCHES

Water treatment facilities are especially hard on equipment and hardware. Each is unique with its own challenges. PS DOORS manufactures access solutions that are specifically engineered for water treatment facilities. Our monorail doors are perfect for loading and unloading chemical drums into a facility, and our sliding roof hatches make it easier to move large equipment in and out of a building. Plus, each door can be completely customized to help improve efficiency and safety for your water treatment facility.

MONORAIL DOORS

EASY OPERATION AND INCREASED EFFICIENCY:

- Available in bi-part sliding door or paired swing door
- Great for transporting chemical drums in and out of chlorine or chemical access rooms
- Built to handle wind loads

DURABLE CONSTRUCTION THAT LASTS:

- Constructed of stainless steel (316L/304) or galvanized steel sheeting

Monorail Sliding Doors

Monorail Swing Doors

SLIDING ROOF HATCH

EASY TO OPERATE:

- Provides roof access that is perfect for moving large equipment in and out of the facility
- Manual or electric operation
- Operates in any weather condition

STANDS UP TO TOUGH ENVIRONMENTS:

- Available in mild steel, stainless steel or aluminum construction
- Panels are fully insulated
- Features durable, full-perimeter brush seals
- Structurally engineered frame

Sliding Roof Hatch

Work with PS DOORS to design a door to solve your unique water treatment facility challenges.
